

OFFICE SETUP IN 20FT CONTAINER

SYNERGY
INNOVATIVE DIVING EQUIPMENT TRADING LLC

INSPIRING • ENGINEERING • INNOVATION

Our 20ft Office Container Setup was developed to provide a practical, comfortable, and fully functional workspace for remote and demanding project environments. Built from a standard ISO shipping container, this modular office unit offers a cost-effective alternative to traditional site offices while maintaining the durability and portability required for industrial applications.

Designed for rapid deployment, the container can be easily transported and installed at construction sites, marine facilities, oil and gas projects, mining camps, and other temporary work locations where a reliable office space is essential.

KEY FEATURES:

- Desk and seating arrangements for administrative personnel.
- Integrated shelving and secure storage cabinets.
- LED lighting system and electrical outlets.
- Air conditioning for enhanced comfort.
- Thermal and acoustic insulation.
- Durable interior wall and floor finishes.
- Lockable access doors and secure windows.
- Provision for network and communication systems.

Synergy designed and manufactured a fully customised 20ft office container equipped with modern workplace amenities. The unit features thermal insulation, air conditioning, LED lighting, electrical distribution systems, and dedicated workspace areas to support day-to-day operations.

The interior layout is optimised to maximise available space while maintaining comfort & productivity. High-quality finishes & robust construction ensure long-term durability & minimal maintenance requirements.

THE CHALLENGE:

Remote projects often require office facilities in locations where permanent infrastructure is unavailable or impractical. The challenge was to create a compact yet efficient workspace that offers a comfortable working environment while withstanding harsh site conditions.

The office needed to accommodate administrative activities, provide secure storage for documents and equipment, & include all necessary electrical & climate control systems without compromising mobility.

THE RESULT:

The completed 20ft Office Container Setup delivers a safe, comfortable, and efficient working environment that can be rapidly deployed to any project location. Its modular design enables easy transportation and relocation, allowing businesses to maintain operational flexibility while reducing infrastructure costs.

This versatile solution ensures uninterrupted project management and administration capabilities, regardless of site conditions or geographical constraints.

Explore our custom office containers and find the ideal solution for your project requirements.
