

# 20FT STORAGE CONTAINER

**SYNERGY**  
INNOVATIVE DIVING EQUIPMENT TRADING LLC

USA • UK • INDIA • AUSTRALIA • JAPAN • SINGAPORE

The Storage Container was developed to provide a secure, durable, and easily transportable solution for storing equipment, tools, consumables, spare parts, and project materials in demanding operational environments. Built from robust ISO or DNV-certified container structures, the unit offers excellent protection against harsh weather conditions while ensuring equipment remains organized, accessible, and secure. These storage containers are widely used across offshore, marine, construction, oil & gas, and industrial projects where reliable storage facilities are essential for daily operations.

## KEY FEATURES:

- Heavy-duty storage racks for organized equipment and material storage
- Lockable access doors for enhanced security
- Heavy-duty steel construction for maximum durability
- Internal lighting and ventilation system
- 2 x AC 110V, 16A power outlets (Optional)
- 1 x AC 220V, 32A power outlet
- 1 x AC 415V, 16A industrial power outlet
- Forklift pockets and lifting points for easy transportation
- Suitable for offshore, marine, construction, and industrial environments

Synergy engineered a robust Storage Container designed to provide secure and organized storage for equipment, tools, consumables, and spare parts. The container is fitted with heavy-duty storage racks to maximize available storage space while ensuring easy access to stored items.

To support operational requirements, the unit is equipped with multiple electrical power outlets, including 110V, 220V, & 415V supplies, allowing equipment charging, testing, & maintenance activities to be performed directly within the container.

## THE CHALLENGE:

Project sites often require secure storage facilities for valuable equipment and materials.

Traditional storage methods may expose assets to theft, environmental damage, corrosion, and operational inefficiencies.

The challenge was to create a containerized storage solution that provides maximum protection, efficient space utilization, and easy transportation between project locations.

## THE RESULT:

The completed Storage Container provides a secure and efficient solution for protecting valuable equipment and materials while improving site organization and operational efficiency.

Its modular and transportable design enables rapid deployment to any project location, ensuring equipment remains protected, accessible, and ready for use whenever required.

Explore our ISO & DNV storage container solutions tailored to offshore, marine, construction, & industrial applications.
