

BASKET STRETCHER (DIVER RESCUE STRETCHER)

SYNERGY
INNOVATIVE DIVING EQUIPMENT TRADING LLC

INSPIRING • ENGINEERING • INNOVATION

The Basket Stretcher with Slings is a robust and versatile rescue solution designed for diver recovery and emergency evacuation in marine, offshore, and challenging environments. Engineered for sea, air, and land rescue operations, it ensures safe handling and rapid response during critical situations.

Built with high-strength materials and equipped with helicopter lifting slings, the stretcher enables efficient casualty transport, including aerial evacuation when required.

APPLICATIONS

- Offshore diving operations
- Marine and shipboard rescue
- Helicopter evacuation (MEDEVAC)
- Confined space rescue
- Emergency response teams

SPECIFICATIONS

- Dimensions (L×W×H) : 216 × 66 × 24 cm
- Load Capacity : 160 kg
- Net Weight : 18 kg
- Design Type : Split / Detachable
- Material : ABS + Stainless Steel

KEY FEATURES

- Designed for diving, offshore, and emergency rescue operations
- Compatible with helicopter lifting systems
- Detachable split design for easy transport and storage
- Lightweight yet high-strength construction
- Equipped with adjustable leg restraints and safety belts
- Stainless steel safety buckles for secure fastening
- Durable Oxford leather mattress – easy to clean and maintain
- Fire-resistant, water-resistant, and corrosion-resistant materials
- Suitable for on-site rescue and confined space operations
- Can be securely fixed during air transport
