SY-FSYL-XX 232 Bar Faber Steel Cylinder Diving Tanks

All over the world Faber has earned their reputation for its high standards of quality and for their capability to comply with the most stringent specifications set down by International Bodies, Local Authorities and its customers. Their production cycle involves hot zinc spraying coupled with a primer and top coat of paint, which helps stop corrosion, they are one of the most popular choices for divers tanks in the UK.

All our 232bar Faber steel diving cylinders are all supplied complete with a standard DIN convertible cross-flow valve, compatible with all scuba diving regulators using the DIN or A-Clamp (International) 1st stage fitting.

Faber cylinders can also be supplied O2 Clean (O2 serviced with an O2 clean cross-flow valve) and suitable for use with enriched air. This takes 7-10 working days and carries an extra charge of £20, please contact us for details on this.

Dive tank sizes available included 3L, 7L, 10L, 12.2L (Tall), 12.5L (Dumpy) and 15L sizes. 300 bar faber cylinders are also available.

Cylinder boots, tank handles and mesh are available to buy separate. We are able to fill and service cylinders in store.

Note: diving cylinders can only be shipped empty. Due to shipping regulations diving cylinders and valves are shipped in separate packages. If you purchase multiple cylinders each cylinder will be packaged separate and valves will be packaged together.
