BLACK JET FINS WITH METAL OR PLASTIC BUCKELS – SYNERGY

DESCRIPTION

Manufactured from a very high quality of rubber, using the latest manufacturing processes. They have a great weight, are extremely robust and have been specifically designed for maximum endurance, exceptional propulsion and the ultimate finning power.

Originally developed for commercial and military use but due to their compact design, they are equally suited to wreck diving, cave dives and technical diver applications, where a shorter length dive fin is preferred.

For many years, these diving fins have been the preferred choice of our military divers in addition to most commercial, technical and deep divers, around the globe.

In addition, these fins are available with the traditional metal 'clamp' style fin strap buckles or the modern heavy-duty Fastex 'quick release' fin strap buckles.

Please Note-Our Spring Fin Straps are only suitable for use with the Fastex buckle version of these Jet Fins.

Also-The listed fin sizes are for wetboots or standard width drysuit boots. For wide fitting drysuit boots, please select on esize higher than your drysuit boot size.

BLACK JET FINS WITH METAL OR PLASTIC BUCKELS – SYNERGY

Size	BOOT
M	UK 4-5
L	UK 6-7
